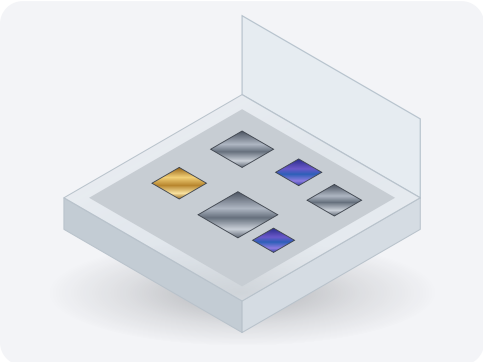
SERIES H19 · GEL BOXES

Gel-adhesive chip boxes



A soft, tacky gel layer holds chips, windows and small substrates in place during shipping, but releases them cleanly with tweezers or a vacuum pen. Choose a lower retention for very thin or fragile parts.

- Three retention levels: low, medium, high
- Clear hinged lid for visual inspection
- Re-usable; clean gel with IPA
- Ideal for pre-diced chips and 2D-material samples
